

## **Emergency Call System**

The objective of this system is to provide an answering service to the general public for emergency problems which occur after regular working hours, on weekdays and on statutory holidays. The department telephone line is (506)548-0463, which is answered by the police dispatch.

Problems are not considered emergencies when the nature of the problem is such that corrective action can wait until the next regular working day( e.g. routine call, complaints or request for information) and there is no danger of personal injury, damage to private property or vehicle traffic.

Emergency situations are immediately relayed to the General Foreman on call duty. Response involves inspection resulting either in corrective action or if it isn't deemed to be an emergency, the Police dispatch is advised that action will be taken as soon as practical.
